

# THE STAKES ARE HIGH. THE RIGHT PARTNER MATTERS.

Lantana  
CONSULTING GROUP

**The PACT Act has expanded VA's obligation to screen, track, and care for millions of Veterans exposed to toxic substances** — requiring new data infrastructure, interoperable reporting systems, and quality measurement frameworks that simply don't currently exist at scale. Simultaneously, the Elizabeth Dole Act, Section 108 transforms VA's health information standards adoption from a strategic priority into a legal obligation — with formal planning and implementation requirements that VA program offices must now execute.

Lantana is ready today — with proven HL7 FHIR® standards expertise, a deployable data platform (Link™), and a clinical informatics team that understands both the technology and the Veteran population it serves. Every month of delay in building robust health data infrastructure is a month that eligible Veterans may not receive the benefits and care they've earned.

**Advancing the Health of Those Who Served — Through Smarter Data, Stronger Standards, and Scalable Innovation.** Lantana Consulting Group is an employee-owned small business dedicated to transforming healthcare delivery through standards-based interoperability, clinical quality measurement, and scalable health data exchange solutions. Aligned with the VA's mission to fulfill President Lincoln's promise to care for those who have served, Lantana brings deep federal health IT expertise directly applicable to VHA transformation, OIT modernization, and OEHRM implementation priorities. With a proven record in federal health program delivery and a uniquely relevant combination of HL7® standards authorship and deployable health IT platforms, Lantana offers precisely the capabilities the VA now requires to fulfill its obligations under Section 108 of the Elizabeth Dole Act (P.L. 118-210).

## CORE CAPABILITIES:

- Health IT Interoperability & FHIR-Based Standards Leadership
- Electronic & Digital Clinical Quality Measurement (eCQM/dQM)
- Public Health Data Modernization & Surveillance
- Clinical Informatics Expertise Across the Care Continuum
- Agile Program Delivery & Federal Stakeholder Coordination

We invite VA Contracting Officers, CORs, Program Managers, and senior VHA/OIT leadership to schedule a 30-minute capabilities and compliance briefing — a direct, focused conversation about how Lantana's standards authorship, Link™ platform, and federal program expertise can accelerate your Elizabeth Dole Act implementation plan and VA strategic priorities simultaneously.

## BUSINESS CREDENTIALS:

- EMPLOYEE-OWNED SMALL BUSINESS
- UEI #: E4PYLU3XDL39
- DUNS #: 557565814
- CAGE CODE: 4N8M9
- NAICS CODES: 541511, 541512, 541519, 541611, 541690

## VEHICLES:

- GSA MAS: 541519 (Other Computer Related Services)
  - ▶ 4151 Health Information Technology Services
  - ▶ 54151S Information Technology Services
  - ▶ 541690 Technical Consulting Services
  - ▶ 541611 Management and Financial Consulting, Acquisition and Grants Management Support, and Business Program and Project Management Services
  - ▶ OLM Order Level Materials
- CMS\_MIDS\_III\_IDIQ\_2018: 541690 (Other Scientific and Technical Consulting Service\_
- CONTRACT VEHICLES: GSA MAS, IHT 2.0, CCN Next Gen

AUTHORS OF THE STANDARDS. BUILDERS OF THE INFRASTRUCTURE. PARTNERS IN THE MISSION.

### Health IT Interoperability & FHIR-Based Standards Leadership

The VA's Electronic Health Record Modernization (EHRM) initiative demands seamless, standards-compliant data exchange across a complex ecosystem of EHRs, HIEs, and federal systems. Lantana authors HL7 FHIR® Implementation Guides and builds reference implementations that enable real interoperability, not theoretical compliance. We directly support OEHRM goals by ensuring VA clinical data flows accurately, securely, and meaningfully across care settings serving 9+ million enrolled Veterans.

### Electronic & Digital Clinical Quality Measurement (eCQM/dQM)

VHA's performance accountability requirements and Elizabeth Dole Act SEC. 108's standardized data exchange mandate converges at quality measurement. Lantana's nationally recognized expertise in developing, maintaining, and evaluating eCQMs and digital quality measures (dQMs), transitioning legacy measures to FHIR using QICore and Clinical Quality Language (CQL). We reduce provider burden on VA clinicians while delivering the performance data VA leadership needs to improve Veteran health outcomes and meet regulatory reporting mandates.

### Public Health Data Modernization & Surveillance

Supporting VA's role as a critical public health infrastructure, particularly in the wake of PACT Act expansion, Lantana enables large-scale data acquisition and exchange across EHRs, Health Information Exchanges (HIEs), and public health authorities. Our Link™ platform is purpose built for this mission, supporting high-volume, automated health data workflows that keep VA ahead of emerging Veteran health threats, including toxic exposure monitoring and post-deployment surveillance.

### Clinical Informatics Expertise Across the Care Continuum

VA requires partners who understand both the technology and the clinical environment. Lantana's team includes credentialed experts in nursing informatics, pharmacy informatics, and public health professionals who speak the language of VA frontline providers and translate clinical needs into actionable technical solutions for VHA program offices and VA OIT.

### Agile Program Delivery & Federal Stakeholder Coordination

VA's complex, multistakeholder environment demands disciplined program management and cross-agency collaboration. Lantana delivers Agile-based project execution, federal program coordination, and cross-stakeholder facilitation, ensuring on-time, on-budget delivery that keeps pace with VA's evolving priorities, Congressional mandates, and OIT transformation timelines.

## PAST PERFORMANCE HIGHLIGHTS:

### National Healthcare Safety Network (NHSN) CDC

Lantana has supported the CDC's National Healthcare Safety Network, the nation's most widely used healthcare-associated infection tracking system. This work directly parallels VA's need for robust infection surveillance and public health data reporting across its 170+ medical centers — demonstrating Lantana's ability to operate at federal health system scale with reliability and standards compliance.

### FHIR® Implementation Guide Authorship — 100+ Guides Delivered

Lantana has authored more than 100 HL7 Implementation Guides supporting interoperability across federal and commercial health ecosystems. For VA's OEHRM program — where data translation between Oracle Health (Cerner), legacy VistA systems, and external partners remains a persistent challenge — this track record represents a direct, deployable capability with measurable risk reduction.

### Federal Quality Measurement Program Support

Lantana's work supporting federal health program measurement and reporting initiatives, including eCQM development, FHIR-based measure transitions, and stakeholder education, mirrors the requirements of VA's OQPS and VHA's ongoing performance improvement programs. Our clinical and technical teams have delivered against complex, multi-stakeholder federal measurement mandates.
